

AI Tools Admin Controls

Quick Reference Guide for IT Administrators

Claude Desktop • Cursor • ChatGPT • Gemini • Last updated: June 2026

Contents

- 1. Overview & Scope
- 2. Claude (Desktop & Web) — Admin Settings
- 3. Cursor — Admin Settings
- 4. ChatGPT — Admin Settings
- 5. Gemini (Google Workspace) — Admin Settings
- 6. Cross-Tool Comparison Matrix
- 7. Unified SSO Quick Reference
- 8. Implementation Priority

1. Overview & Scope

This document provides a consolidated reference of **admin-level controls** for the four most common AI assistant tools deployed in enterprise environments. These are settings configured by IT teams through admin consoles, MDM systems, and APIs — not end-user preferences.

Tool	Admin Interface	Plans with Admin Controls	Enforcement Mechanism
Claude	claude.ai Admin Console	Team, Enterprise	Server-managed settings + MDM
Cursor	cursor.com Dashboard	Business, Enterprise	Dashboard push + MDM
ChatGPT	chatgpt.com/admin	Business, Enterprise	Admin console (web-only)

Gemini	admin.google.com	Workspace Business+, Enterprise	Admin console + Chrome policies
---------------	------------------	------------------------------------	------------------------------------

2. Claude (Desktop & Web)

Admin Console: claude.ai → Admin Settings

Roles: Primary Owner (full access + billing) · Admin (users, policies, audit) · Member (use within policies)

Identity & Access

Setting	Location	Plan
SAML 2.0 / OIDC SSO	Security → SSO	Enterprise
Enforce SSO	Security → SSO	Enterprise
Domain verification	Security → Domains	Team+
Domain capture	Security → Domains	Team+
SCIM provisioning	Security → SCIM	Enterprise

Key Managed Settings (Server-Managed)

Setting Key	Type	Recommended (Enterprise)
allowBypassPermissions	Boolean	false
allowAutoPermissions	Boolean	false
channelsEnabled	Boolean	false (regulated) / true
allowedMcpServers	Array	Explicit allowlist only
deniedMcpServers	Array	Known-risky packages
permissions.deny	Array	Block rm -rf, curl bash, sudo, .env reads
terminalCommandTimeout	Integer	120 seconds

Desktop Policy Keys (MDM)

Key	Type	Lockdown Value
isLocalDevMcpEnabled	Boolean	false
isDesktopExtensionEnabled	Boolean	false
isDesktopExtensionDirectoryEnabled	Boolean	false
isClaudeCodeForDesktopEnabled	Boolean	true (or false if not needed)
secureVmFeaturesEnabled	Boolean	false
disableAutoUpdates	Boolean	false
autoUpdaterEnforcementHours	Integer	24

MDM Deployment

Platform	Mechanism	Identifier
macOS	Configuration Profile (plist)	com.anthropic.claudefordesktop
Windows	Registry (Intune/GPO)	HKLM\SOFTWARE\Policies\Claude

Data Governance

Policy	Status
No training on data	TEAM+
Data residency (US/EU)	ENTERPRISE
SOC 2 Type II	YES
HIPAA (BAA)	ENTERPRISE

3. Cursor

Admin Dashboard: cursor.com/settings

Roles: Owner (full + billing) · Admin (members, settings) · Unpaid Admin (admin without seat) · Member

Enterprise: Organizations layer — multi-team governance from one dashboard (June 2026)

Identity & Access

Setting	Location	Plan
SAML SSO	Security & Identity → SSO	Enterprise
SCIM 2.0 provisioning	Security & Identity → SCIM	Enterprise
AllowedTeamId (MDM)	MDM policy	Enterprise
Restrict CLI access	Dashboard → User Access	Enterprise
Restrict Cloud Agents	Dashboard → User Access	Enterprise
Disable BYOK	Dashboard → User Access	Enterprise

Security Settings

Setting	Location	Effect
Privacy Mode (enforced)	Settings → Privacy	Zero data retention with all AI providers
MCP server allowlist	Security → MCP Servers	Only approved MCP servers
Extension allowlist	Security & Identity	Restrict to approved extensions
Repository blocklist	Security	Block specific repos from AI access
Require sandbox	Security	Force sandbox for agent sessions
Network allow/denylist	Security	Control outbound access from sandbox

Spend Governance

Setting	Scope	Plan
Team monthly spending limit	Whole team	Business+
Per-member spending limit	Individual users	Enterprise
Group-based limits	SCIM directory groups	Enterprise
Model allowlist/blocklist	Provider or model level	Enterprise
Admin-only limit changes	Prevents member override	Business+

MDM Deployment

Policy Key	Type	Recommended
AllowedTeamId	String	Your team ID(s)
AllowedExtensions	String (JSON)	Approved extension IDs
WorkspaceTrustEnabled	Boolean	true
UpdateMode	String	"manual"

Platform	Identifier
macOS	com.todesktop.230313mzl4w4u92
Windows	HKLM\SOFTWARE\Policies\Cursor
Linux	~/.cursor/policy.json

Monitoring

Capability	Plan
Usage analytics	Business+
Audit logs (tamper-proof)	Enterprise
AI code tracking (per-commit)	Enterprise
Admin REST API	Business+

4. ChatGPT

Admin Console: chatgpt.com/admin

Roles: Owner (full + billing + identity) · Admin (users, groups, routine admin) · Member · Analytics Viewer

Seat Types: ChatGPT seat · Codex seat (can hold both)

Enterprise: Global Admin Console for multi-workspace management

Identity & Access

Setting	Location	Plan
SAML SSO	Identity & Provisioning	Enterprise
Enforce SSO	Identity & Provisioning	Enterprise
Domain verification	Identity & Provisioning	Enterprise
SCIM directory sync	Identity & Provisioning	Enterprise
IP allowlisting	Identity & Provisioning	Enterprise
Restrict to verified domains	Identity & Provisioning	Enterprise

Feature Permissions (RBAC)

Workspace defaults apply to all users; custom roles override per group.

Feature Toggle	Default (Recommended)	Notes
ChatGPT Agent	Off	Autonomous agent — high risk
Canvas	On	Collaborative editing
Codex	Off	Code assistant — separate seat
Custom GPTs — Create	Off	Require approval workflow

Custom GPTs — Use	On	Internal GPTs only
Third-party GPTs	Off	GPT Store access
Memory	Off	Cross-conversation data persistence
Web search	On	Real-time internet access
File uploads	On	Document attachment
Image generation	On	DALL-E
Voice mode	Off	Audio interaction
Apps & actions	Off	Connected integrations (email, calendar)
Data analysis	On	Code interpreter

Usage Limits (Enterprise RBAC)

Setting	Options	Effect
Limit level	None / Low / Standard / High / Custom	Weekly per-user credit cap
Enforcement	Admin Alert / Hard Cap	Notify vs. block at limit
Multi-role inheritance	Most permissive wins	Watch for unintended escalation

Data Governance

Policy	Status
No training on data	BUSINESS+
Data residency (US/EU/UK/JP)	ENTERPRISE
Enterprise Key Management	ENTERPRISE
Retention policy (configurable)	ENTERPRISE
Compliance API (export)	ENTERPRISE
SOC 2 Type II, ISO 27001	YES
HIPAA (BAA)	ENTERPRISE

5. Gemini (Google Workspace)

Admin Console: admin.google.com → **Generative AI**

Roles: Super Admin · Gemini Settings Admin · Groups Admin · Custom Roles

Scoping: Per Organizational Unit (OU) or per Group

Service Controls

Service	Location	Scoping
Gemini app (gemini.google.com)	Generative AI → Gemini app	OU / Group
Gemini Enterprise (agents, CLI)	Generative AI → Gemini Enterprise	OU / Group
Gemini in Gmail	Gemini for Workspace → Feature access	OU / Group
Gemini in Docs/Sheets/Slides/Drive	Gemini for Workspace → Feature access	OU / Group
Gemini in Meet	Gemini for Workspace → Feature access	OU / Group
Gemini in Chat	Gemini for Workspace → Feature access	OU / Group
NotebookLM / NotebookLM Plus	Generative AI → NotebookLM	OU / Group
Workspace Studio	Generative AI → Workspace Studio	OU / Group
Google Vids	Generative AI → Google Vids	OU / Group

Workspace Intelligence (Data Sources)

Source	What It Controls	Recommended
Gmail	Gemini can reference email content	Evaluate per OU
Drive	Gemini can reference Drive files	On (with DLP)
Calendar	Gemini can reference calendar events	On
Chat	Gemini can reference Chat messages	Off (sensitive)

Security Controls

Control	Location	Effect
2-Step Verification	Security → 2SV	Enforce MFA for all users
Context-Aware Access	Security → CAA	IP, device, OS, location restrictions
DLP rules	Security → DLP	Block PII/sensitive data in AI prompts
API controls	Security → API Controls	Restrict third-party app access
Session control	Security → Session	Configure session duration

Data Governance

Policy	Status
No training on customer data	ALL EDITIONS
Data residency	WORKSPACE DATA REGIONS
Google Vault (retention + eDiscovery)	ENTERPRISE
DLP integration	ENTERPRISE
SOC 2/3, ISO 27001, FedRAMP High	YES
HIPAA (BAA)	ENTERPRISE PLUS

Monitoring

Capability	Location
Gemini usage reports	Reporting → Gemini
Admin audit logs	Security → Investigation
Gemini activity logs	Security → Investigation → Gemini
BigQuery export	Reporting → BigQuery Export
Custom alerts	Security → Alert Center

6. Cross-Tool Comparison Matrix

Identity & Access Management

Capability	Claude	Cursor	ChatGPT	Gemini
SAML SSO	ENTERPRISE	ENTERPRISE	ENTERPRISE	ALL EDITIONS
SCIM provisioning	ENTERPRISE	ENTERPRISE	ENTERPRISE	CLOUD IDENTITY
Domain verification	TEAM+	N/A	ENTERPRISE	DEFAULT
IP allowlisting	ENTERPRISE	N/A	ENTERPRISE	CONTEXT-AWARE
MFA enforcement	VIA IDP	VIA IDP	VIA IDP	NATIVE
Custom RBAC roles	3 FIXED ROLES	3 FIXED ROLES	ENTERPRISE	CUSTOM ROLES

Data Governance

Capability	Claude	Cursor	ChatGPT	Gemini
No training on data	TEAM+	ALL PLANS	BUSINESS+	ALL EDITIONS
Data retention control	ENTERPRISE	N/A	ENTERPRISE	ADMIN CONSOLE
Data residency	ENTERPRISE	N/A	ENTERPRISE	DATA REGIONS
Customer-managed keys	ENTERPRISE	N/A	EKM	CMEK (GCP)
DLP integration	VIA API	N/A	COMPLIANCE API	NATIVE DLP
Compliance export	ENTERPRISE	N/A	COMPLIANCE API	VAULT/BIGQUERY

Feature Governance

Capability	Claude	Cursor	ChatGPT	Gemini
Disable specific features	MANAGED SETTINGS	DASHBOARD + MDM	RBAC PER FEATURE	PER-ROLE SETTINGS
Extension/plugin control	MDM POLICY	ALLOWLIST	APP GOVERNANCE	MANAGED EXTENSIONS
Model access restrictions	PLAN TIER	ALLOW/BLOCKLIST	PER-ROLE LIMITS	EDUCATION BANS
Usage/spend limits	PLAN LIMITS	PER-USER CAPS	PER-ROLE WEEKLY	QUOTA
MCP/tool server control	ALLOW/DENYLIST	ALLOW/DENYLIST	N/A	N/A

Monitoring & Compliance

Capability	Claude	Cursor	ChatGPT	Gemini
Audit logs	ENTERPRISE	ENTERPRISE	ENTERPRISE	CLOUD AUDIT LOGS
Usage analytics	TEAM+	BUSINESS+	BUSINESS+	ADMIN REPORTS
Admin API	N/A	REST API	N/A	ADMIN SDK
SOC 2 Type II	YES	YES	YES	YES
HIPAA (BAA)	ENTERPRISE	N/A	ENTERPRISE	ENT. PLUS
FedRAMP	N/A	N/A	N/A	ENT. PLUS

Deployment & Enforcement

Capability	Claude	Cursor	ChatGPT	Gemini
------------	--------	--------	---------	--------

MDM (macOS plist)	YES	YES	WEB ONLY	CHROME POLICY
MDM (Windows registry)	YES	YES	WEB ONLY	CHROME POLICY
Server-managed push	ADMIN CONSOLE	DASHBOARD	ADMIN CONSOLE	ADMIN CONSOLE
Update enforcement	FORCE-RESTART	UPDATEMODE	SAAS (AUTO)	SAAS (AUTO)
Multi-team/workspace	SINGLE ORG	ORGANIZATIONS	GLOBAL ADMIN	OU HIERARCHY

7. Unified SSO Quick Reference

Tool	Protocol	IdP Setup Location	Enforcement Option	Shared Config?
Claude	SAML 2.0 / OIDC	claude.ai → Admin → Security → SSO	Enforce SSO toggle	No (independent)
Cursor	SAML	cursor.com/settings → Security & Identity	Require SSO for all	No (independent)
ChatGPT	SAML	chatgpt.com/admin → Identity & Provisioning	Enforce SSO toggle	Yes — shared with OpenAI API Platform
Gemini	SAML 2.0 (or native Google auth)	admin.google.com → Security → SSO	2SV enforcement + CAA	Inherits Workspace auth

8. Implementation Priority

Phase 1: Identity & Access (Highest Priority)

- ☐ Deploy SSO across all four tools
- ☐ Enable SCIM where available for automated provisioning
- ☐ Verify domains and restrict external invites
- ☐ Configure MFA (native or via IdP)

Phase 2: Data Governance

- ☐ Verify training opt-out on all tools
- ☐ Set retention policies aligned with data classification
- ☐ Configure DLP rules (especially Gemini native DLP)
- ☐ Select data residency regions where available

Phase 3: Feature Governance

- ☐ Audit enabled features per tool — disable unused high-risk features
- ☐ Configure RBAC roles (ChatGPT) and managed settings (Claude)
- ☐ Set extension/MCP allowlists (Cursor, Claude)
- ☐ Establish spending limits (Cursor, ChatGPT)

Phase 4: Monitoring & Compliance

- ☐ Enable audit logs on all tools and route to SIEM

- ☐ Set up usage analytics dashboards
- ☐ Configure alerts for anomalous usage patterns
- ☐ Document controls for compliance frameworks (SOC 2, ISO 27001)
